Intrinsyc Selected as Microsoft Windows Embedded Partner of the Year

Intrinsyc recognized as leading Windows Embedded Partner in the Independent Software Vendor category

Vancouver, BC, December 3, 2001 - Intrinsyc Software, Inc. (TSE:ICS) today announced it has received Microsoft Corp.'s Windows Embedded Partner of the Year award in the Independent Software Vendor (ISV) category. The award was presented at the close of Microsoft's Windows Embedded Partner (WEP) Summit event in Las Vegas, Nevada.

Intrinsyc was given the award for its innovative Windows CE 3.0-based networking and remote management software solutions, early commitment to emerging embedded Microsoft .NET technologies and on-going support and promotion of Windows CE 3.0 and Windows CE .NET in a broad range of next generation, smart Internet devices.

"We created the Windows Embedded Partner of the Year awards to recognize the contribution that companies like Intrinsyc have made to the embedded market with powerful Windows-based software solutions," said Scott Horn, Director of Marketing for the Embedded and Appliance Platforms Group at Microsoft. "Intrinsyc's networking and remote management solutions, coupled with either Windows CE 3.0 or Windows CE .NET, allow developers to quickly and easily bring cutting edge embedded devices to market."

"Being named Windows Embedded Partner of the Year in the Independent Software Vendor category is an honor that we are very proud of," said Neil McDonnell, President and Chief Executive Officer, Intrinsyc Software. "Our collaborative relationship with Microsoft has provided us early access to new technologies, which has ensured our ability to deliver distinctive solutions that reduce time to market, decrease internal development costs and help customers maintain a competitive edge. We've also been afforded access to new customers and markets, and look forward to growing our relationship with Microsoft," added McDonnell.

About Intrinsyc
Intrinsyc is a leading provider of intelligent device and enterprise computing solutions to Global 2000 companies. Intrinsyc develops open standards based, intelligent device systems by building on its core reference design technologies, linking intelligent devices to information-rich enterprise applications, and managing global networks of devices. Forward Looking Statements

This press release may contain forward-looking statements that involve risks and uncertainties. These forward-looking statements relate to, among other things, plans and timing for the introduction or enhancement of our services and products, statements about future market conditions, supply and demand conditions, and other expectations, intentions and plans contained in this press release that are not historical fact. Our expectations regarding future revenues depend upon our ability to develop and supply products, which we do not produce today and that meet defined specifications. When used in this press release, the words "plan," "expect," "believe," and similar expressions generally identify forward-looking statements. These statements reflect our current expectations. They are subject to a number of risks and uncertainties, including, but not limited to, changes in technology and changes in the pervasive computing market. In light of the many risks and uncertainties surrounding the pervasive computing market, you should understand that we couldn't assure you that the forward-looking statements contained in this press release will be realized. The Company disclaims any intent or obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise.
